

Mailsafe 110 - Suspect Mail Isolation - Top Opening

Mailsafe 110

Suspect mail - whether or not it turns out to be a real device - can cause great disruption to an organisation and its business continuity.

The Mailsafe 110 is designed to live alongside mail scanning equipment for the rapid, safe isolation of any item that is of concern.

Evacuation procedures can then be carried out in a safe manner. Use of the mailsafe may also reduce the extent of evacuation required within a facility.

Should a device detonate inside the mailsafe, it will minimise damage to the surrounding room and contain the forensic evidence from the device - both factors minimising the downtime and disruption to the organisation.

Key Features:

Available as top opening (Mailsafe 110) and front opening forms (Mailsafe 100).

External Dimensions:

Top Opening: 680mm x 680mm x 700mm

Front Opening: 650mm x 700mm x 700mm
