

Scansafe - Suspect Mail Screening Protection

Scansafe

Suspect mail - whether or not it turns out to be a real device - can cause great disruption to an organisation and its business continuity.

The Scansafe is designed to encase the Scanmax 25 mail scanning equipment for the rapid, safe isolation of any item that is of concern.

Evacuation procedures can then be carried out in a safe manner. Use of the scansafe may also reduce the extent of evacuation required within a facility.

Should a device detonate inside the scansafe it will minimise damage to the surrounding room and contain the forensic evidence from the device - both factors minimising the downtime and disruption to the organisation.

Key Features:

Based on the proven Mailsafe system

Designed around the Scanmax 25 X-Ray Unit.

Rated to 235g TNT equivalent

External Dimensions:

700mm wide x 2100mm tall x 900mm deep

Weight: 400kg (without Scanmax unit)

Unit on wheels for placement and access for maintenance.

Scansafe Unit has cable access port in rear for minimum disturbance.
